

# Sure-Seal Spiral™

## Product Overview

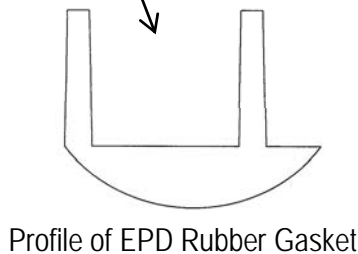

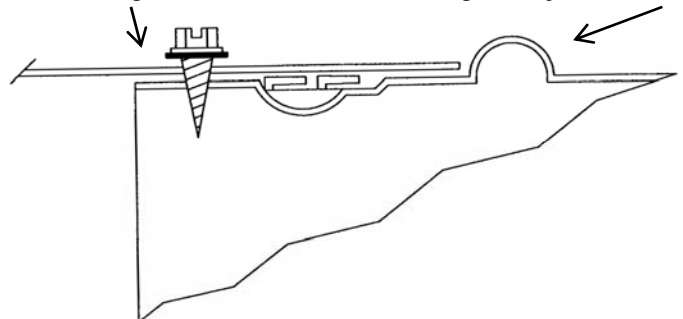

Sure-Seal Spiral, a single wall self-sealing spiral ductwork system that reduces installation cost. Our new gasketed connection is quick and easy. No messy sealer is required, simply slide the pieces together and secure with 1/8" self-tapping gasketed screws. Our patented gasket is a dual lipped profile of EPD rubber that has been tested (using Langdon's manufactured spiral pipe) from Negative 2" W.G. to Positive 10" W.G. achieving a Class 3 seal rating in accordance with SMACNA HVAC Air Duct Leakage Test Manual (first edition 1985). The gasket material is suitable for use in applications ranging in temperature from 200°F down to -20°F. Sure-Seal Spiral is available in galvanized, galvalneal, stainless steel and aluminum in even sizes from 4" to 20".

Use the Diagram below for screw quantity and placement sequence

Install 1/8" gasketed screws on outer edge, away from bead
